I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I the consumer demand and deserve. It is amazing that after I PAY for a service that is beneficial for me and my family, we still have to fight for the right to have it. The NAB needs to focus on real issues, like how to make their radio programming better. Maybe they should have "a lil cheeze with that whine".
